22-26 OCTOBER 2018
LONDON

GEC

GLOBAL ENGINEERING CONGRESS

ice.org.uk/congress

*Gathering the profession to determine how to make the
UN Sustainable Development Goals a reality*

In association with

European Council
of
Civil Engineers

Commonwealth
Engineers' Council

“Saving our planet, lifting people out of poverty, advancing economic growth... these are one and the same fight. We must connect the dots between climate change, water scarcity, energy shortages, global health, food security and women’s empowerment. Solutions to one problem must be solutions for all.”

*Former UN Secretary-General
Ban-Ki Moon*

THE CONGRESS

Join the global engineering community in October 2018 to agree the tools and actions required to deliver sustainable solutions for a changing climate and growing population.

ICE is committed to working in partnership with professionals and organisations who are able to show leadership in embedding sustainability at the heart of engineering.

- 5** day conference
- 90** hours of content
- 100+** global speakers
- 2000+** global delegates
- 150+** countries represented
- 20+** global engineering institutions

Roundtable discussions and workshop programme

Exclusive black tie and gala dinners

Exhibition, networking and governmental engagement programme

Post congress 3 year road map to embed UN SDGs within engineering

SUSTAINABLE DEVELOPMENT GOALS

The United Nations Sustainable Development Goals are a global call to action to end poverty, protect the planet and ensure peace and prosperity for all.

As climate change effects are increasingly felt across the planet, there is an urgent need for coordinated response to achieve the Goals. Industries in every country must shed short-termism, price in sustainability and deliver better outcomes.

BECOME PART OF THE SOLUTION

Embed your organisation at the heart of the global infrastructure sustainability movement at the event where governments, clients, industries and sustainability champions meet.

ICE is offering a limited number of partnerships to innovators seeking to support and create a roadmap of activities to solve the great challenges of the 21st century.

Partnerships extend from the GEC to its three year knowledge sharing campaigns, consisting of thought leadership discussions and content, extensive branding opportunities and networking events.

GLOBAL INNOVATORS £75,000 PACKAGE

- Campaign Advisory Board
- Event wide branding
- 40 minute briefing for 40 experts
- 4 one to one meetings arrange pre congress
- Chair 4 GEC sessions
- +15 Points for additional items

SUSTAINABLE SPECIALISTS £25,000 PACKAGE

- +5 Points to spend on items

Learn how to spend your points in the table below.

THOUGHT LEADERSHIP

Exclusive SDG Partner for event	5
Thought leadership briefing for 30 guests	2
Learning Programme*	5
Joint Lecture for 220 guests*	5
Evening debate for 150 guests*	4
Prestige 5 course dinner for 14 guests	3
V.I.P. Lunch for 40 guests	3
40 minute briefing for 40 experts	2
Joint Sponsorship of Sustainable Infrastructure Toolkit and Report *	1
Roundtable for 12 attendees	1
Competition / Hackathon	B
Mediacube	3
Lead a panel discussion	1

BRANDING

Delegate lanyard sponsorship	3
Event bag sponsorship	3
Speaker lounge / Speaker Lanyards	3
Evening reception sponsor	2
Refreshment break sponsorship	1
Exclusive delegate pack branding	1
Branded Gift	1/day
USBs	1
OGGS Display PODS*	2
Mediacube	3

NETWORKING

Private cocktail reception for 50 guests	3
Focused ½ day workshop for 70 attendees on one SDG	2
Branded hot buffet lunch for delegates	2
Seat Drop	1
One-to-one or boardroom meetings rooms	B
5 course dinner for 16 guests	2

B Bespoke packages
*sponsorship opportunities pre or post GEC

PROGRAMME

There is much detailed and informed research setting out the problems. ICE and our partners want to build a practical plan that allows the global engineering profession to turn words into action.

The Congress will focus on how engineers can better the lives of the billions of people who still face a myriad of challenges, including water poverty, slum accommodation, and poor health.

DAY	THEME	OBJECTIVE
1	Role of engineering in progressing the UN SDGs Launching the Congress, day one will feature a VIP address from UK Government, offer global perspectives and in a programme curated by the WFEO executive leadership, explore the scale of change possible via a coordinated, global engineering plan	Agree parameters for change
2	Challenges, opportunities and solutions Day two will begin examining factors that have stalled progress against the SDGs to date, highlight regulatory and technical changes that offer new hope, and explore what is needed to move to forward	Define ways to enable the changes we need
3	Building sustainable economies and resilient communities Day three delves into how climate resilience can be incentivised, funded and built into all stages of decision making - creating cleaner cities and services	Clarity on methods, requirements and outcomes
4	Engineering and its societal impact Using case studies and research, day four offers guidance and information on how engineers can use new technologies to deliver economically feasible and socially equitable projects	Quantifying social value and how to exploit emerging technologies
5	Driving change – investment, education and governance The Congress will close by offering lessons learnt for the short term, technologies for the medium term and behavioural change for long term achievement of the UN SDGs	Vision for a balanced system that improves lives and offers economic growth

SELECTED KEYNOTE SPEAKERS

- **Guna Gunalan**, Vice President, *AECOM*
- **Chuck Hookham**, *CMS Energy*
- **Cris Liban**, Executive Officer, Environmental Compliance and Sustainability, *LA Metro*
- **Prof. Gong Ke**, *WFEO* President Elect and Member, *UN Science Advisory Council*
- **Hartwig Schaefer**, Vice President, *Global Themes, World Bank*
- **Olivier Loebel**, Secretary General, *Eurau*
- **Kristian Ruby**, Secretary General, *Eurelectric*
