

# Future-proofing vital networks

**23-25 September 2026**  
**Manchester, UK**

## Your invitation to Resilient Transport 2026

The Institution of Civil Engineers (ICE) is delighted to invite you to its first Resilient Transport conference, which it's holding in Manchester, UK, on 23-25 September 2026.

This new event will assemble experts from across the global transport and infrastructure engineering community, along with a wide range of organisations supporting their vital work.

Resilient Transport 2026 offers stakeholders throughout this sector the ideal opportunity to network with clients, asset owners and experts while aligning themselves with cutting-edge studies, technologies and techniques.

The main programme of presentations will run alongside an exhibition on 23-24 September. Technical site visits will follow on 25 September. Various social functions are planned throughout the event too, including welcome drinks and a gala dinner.

Resilient Transport 2026's content is based on technical papers submitted by practitioners for review by the organising committee, which will select the best for presentation at the conference. This will create a programme that highlights the most innovative work to improve the resilience of transport networks around the world.

We look forward to seeing you there.

## About the institution

The ICE is a 97,000-strong global membership organisation with more than 200 years of history.

It is a centre of engineering excellence, qualifying engineers and helping them to maintain lifelong competence, assuring society that the infrastructure they create is safe, dependable and well designed.

Its network of experts offers trusted impartial advice to politicians and decision-makers on how to build and adapt infrastructure to create a more sustainable world.

Resilient Transport is one of many events the ICE holds worldwide each year to help the profession share knowledge and spread best practice as widely as possible. Other notable conferences include Coastal Management and Coasts, Marine Structures and Breakwaters.

## About the conference

Resilient Transport 2026 is concerned with building the resilience of transport networks around the world by improving the design, delivery and operation of their infrastructure.

With presentations offering practical solutions to key challenges facing the sector, this paper-led conference will focus on innovation, climate adaptation and effective asset management.

Its content programme will run over the first two days alongside a sponsor-led exhibition, with speakers presenting their papers in several streams. These will be published after the event.

The presentations will be based on one or more of the following core themes:

1. Building resilience across transport networks and asset lifecycle stages.
2. Adapting ageing infrastructure while balancing budgets and risks.
3. Using digital tools and data to build smarter renewals programmes.
4. Reducing carbon and waste.
5. Applying a systems approach to infrastructure and delivering wider value from projects.
6. Designing assets that can adapt to evolving transport trends.

The final day will offer technical site visits and there will be other activities throughout the event, including a gala dinner. These will give delegates several chances to network with their peers across the transport engineering and infrastructure sector.

## Elevate your impact: sponsor Resilient Transport 2026

---

Are you ready to position your organisation at the forefront of the transport infrastructure community?

Resilient Transport 2026 offers an unparalleled opportunity to connect with industry leaders, asset owners and researchers who are working to make transport networks more resilient.

### Why become a sponsor?

- **Strategic networking opportunities.** This is more than just a conference. As a sponsor, you'll gain direct access to a community of transport engineers, technological innovators, asset owners and climate experts.
- **Target-audience engagement.** Resilient Transport's careful curation by an organising committee incorporating leading consultants, eminent academics and major asset owners will attract the sector's most influential people to the event. As a sponsor, you'll be placing your brand in front of decision-makers who are seeking new solutions and partnerships. It's an unrivalled chance to show what your organisation can offer to a sophisticated and powerful audience. Each delegate represents a chance for you to start a valuable conversation.
- **Showcase of technical excellence.** Sponsors will be immersed in a world of cutting-edge research and technological advances. You'll be at the centre of the ICE's knowledge exchange. Sponsorship shows your commitment to helping push the boundaries of engineering to meet the challenges of climate change. This will ensure that you have the right conversations with the right people at the right times.
- **Visibility and brand positioning.** Our comprehensive sponsorship packages offer several touchpoints for maximum exposure:
  - Prime exhibition space co-located with networking and catering areas.
  - Logo placement in a wide range of conference materials.
  - Access to the delegate list (name and organisation) for networking.
  - Social media and digital marketing exposure for your brand.
- **Investment in future solutions.** By sponsoring Resilient Transport 2026, you're not only promoting your brand; you're investing in vital discussions about future-proofing critical infrastructure around the world.

Don't miss this chance to align your organisation with an event that will become synonymous with innovation and impact in this important sector.

## Sponsorship opportunities by level

---

### Headline

Unique positioning, offering the most prominent branding and highest visibility throughout the event.

### Silver

Premium sponsorship demonstrates high-level support for the sector and provides outstanding brand visibility. It offers unmissable opportunities to network and generate leads.

### Bronze

This package ensures that your company gains enhanced access to experts in the field.

### Exhibitor

Entry level to reach the target audience, offering online branding and lead generation across two exhibition days, with more than 250 visitors interested in products and services that support the sector's work.

### Bespoke sponsorship opportunities

- The gala dinner
- Refreshment breaks
- Lanyards
