

ICE West Midlands Shrewsbury Branch lunch and learn: SEPS solutions for civil and structural applications

Join the ICE West Midlands Shrewsbury Branch for a lunch and learn webinar to explore how expanded polystyrene (EPS) solutions are transforming civil engineering and infrastructure projects through sustainable, lightweight ground engineering approaches, practical design insight and real world project applications.

Attendees will hear from Simon Roberts, national infrastructure manager at BEWI, who will share the applications of EPS across a variety of civil engineering environments, including:

- Key design considerations and structural performance requirements
- Industry standards and compliance requirements
- How EPS systems are contributing to sustainability goals
