

ICE West Midlands BSBC Branch:

Sustainability Management in the Midland Metro Alliance

Join the ICE West Midlands Birmingham, Solihull and Black Country Branch for a talk on sustainability management in the Midland Metro Alliance, showing how strong governance, supported by the right procedures and tools can deliver better engineering and ambitious outcomes.

This session will focus on how sustainability can be effectively embedded into major infrastructure delivery, not as an aspiration, but as a practical, measurable part of engineering decision making.

Francesca De Petris
Tony Gee and Partners
sustainability associate
