1. CHAN Tsz Hon

Biography

Chan Tsz Hon (Oscar) is a third-year student pursuing a Bachelor's degree in Civil Engineering with a minor in Smart City at the Hong Kong University of Science and Technology. His interest in civil engineering was sparked in 2018 when, as a primary school student, he participated in the "Shaping Our Future City" campaign organised by ICE HKA — an experience that shaped his academic journey.

Oscar has since gained practical exposure through two internships: one with MTR focusing on railway operations, and another with Dragages for the Tung Chung West station project. These experiences gave him valuable insight into transportation systems and construction site management.

Beyond academics, Oscar is an active and outgoing individual. He serves as a Student Ambassador at HKUST, where he hones his communication and leadership skills. He is also a team leader at WZQ Charity Organisation (無止橋), organising camping activities and volunteering on community projects. A nature enthusiast, he enjoys cycling, hiking, and photography, often capturing Hong Kong's infrastructure through his lens.

Passionate about promoting civil engineering to the next generation, Oscar is excited to contribute to the G&S committee and connect with fellow students and experienced professionals.

Platform statement

As a candidate for the ICE HKA G&S Committee, I am eager to contribute to the growth and engagement of our graduate and student community. My journey in civil engineering began early, and through internships with MTR and Dragages, I have come to appreciate the breadth and impact of this profession.

I am particularly passionate about promoting civil engineering to secondary school students, just as the "Shaping Our Future City" campaign inspired me years ago. I believe in the power of outreach to spark interest in young minds and help them see the exciting possibilities within our field.

**Institution of Civil Engineers, Hong Kong Association
Graduates and Students Division
Committee election, session 2026-2027
Candidate biography and platform statement**

Being an extrovert and a Student Ambassador, I enjoy connecting with people and building bridges between students, professionals, and the public. I hope to use my communication and teamwork skills to support events, engage with external organisations, and create meaningful networking opportunities for members.

I am open to contributing across all teams and eager to learn from experienced engineers while giving back to the community. If elected, I will bring energy, enthusiasm, and a genuine commitment to serving our fellow graduates and students. Let's shape the future of civil engineering together.

2. LAM Hau Yee

Biography

I am a recent civil engineering graduate from HKUST and a current MSc student, driven by a passion for sustainable infrastructure and cross-border collaboration. My journey with ICE began as a G&S member last session, and I am now eager to contribute more profoundly as a team leader of the External Engagement team.

My technical foundation has been shaped by hands-on experience with major projects. At MTR's Capital Team, I coordinate complex stakeholder communications and resolve design interfaces, giving me direct insight into how our industry operates.

Beyond engineering, I am a proven leader. As Chairman of the HKIE Student Chapter, I revitalised engagement by organising site visits and professional talks, growing attendance and strengthening university-industry ties. I have also been selected for the HKIE Young Members Committee and the ICE G&S, reflecting my commitment to our professional community.

Platform statement

My vision is to build a well-connected, professionally vibrant, and community-engaged G&S division for our members. I believe that great engineering is built on collaboration—between institutions, across borders, and with the public we serve.

1. **Strengthen partnerships with professional institutions.** Drawing on my experience leading joint events at HKIE, I will deepen ties with HKIE, ASCE, and CIHT through collaborative seminars, networking sessions, and technical visits. These connections create richer professional development opportunities and foster a more integrated engineering community in Hong Kong.
2. **Champion "Shaping Our Future City."** This flagship campaign is our chance to inspire secondary students—especially those from under-resourced communities. I will expand its reach through interactive workshops and site visits, showing young people how civil engineering shapes their daily lives and encouraging them to join our profession.
3. **Deepening Industry Connections:** My experience at MTR, AECOM, and Dragages positions me to facilitate high-quality company engagements that give members direct exposure to real-world infrastructure projects and the engineers leading them.

I am committed to dedicating my energy and organisational skills to lead a team that delivers tangible value.

Committee election, session 2026-2027
Candidate biography and platform statement**

3. LAM Ka Chun

Biography

I am a Graduate Civil Engineer and current MSc student at HKUST, driven by a passion for sustainable infrastructure and professional excellence. My technical foundation is currently being shaped by hands-on experience at Build King Holdings Limited, where I work on the Tung Chung New Town Extension (Contract No. NL/2020/03). Coordinating site operations on such a major land supply project has given me direct insight into the complexities of our industry.

My journey with the ICE began as a participant in the G&S South Korea Delegation (2023), and I am now eager to contribute more profoundly to our professional community. Beyond my engineering role, I am a proven leader. As the Immediate Past Chairman of the HKIE Student Chapter (HKMU), I revitalised engagement by strengthening university-industry ties through technical visits and talks.

Currently, I also serve as a Technical Talk and Seminar Sub-committee Member for ICE HKA and the Student Engagement Officer for CIHT HK EPC. I am committed to leveraging my dual perspective as a practitioner and a postgraduate student to lead the External Engagement team effectively.

Committee election, session 2026-2027
Candidate biography and platform statement**

Platform statement

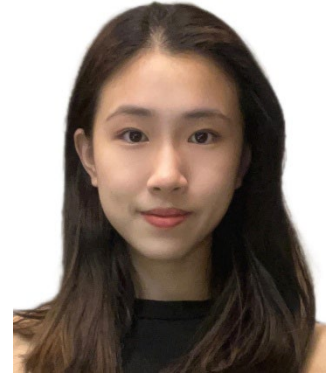

My vision is to build a well-connected, professionally vibrant, and community-engaged G&S division for our members. I believe that the future of engineering lies in the integration of academic innovation, site experience, and cross-institutional collaboration.

1. **Strengthen Partnerships with Professional Institutions:** Drawing on my leadership experience at HKIE and CIHT, I will deepen ties through collaborative seminars and technical visits. These connections create richer development opportunities and a more integrated engineering community in Hong Kong.
2. **Champion Technical & Academic Excellence:** Utilizing my current studies in Civil Infrastructural Engineering and Management at HKUST, I will curate high-level technical talks that bridge the gap between advanced research and "real-world" site applications, such as those used in the Tung Chung New Town Extension.
3. **Inspire the Next Generation:** I will expand the reach of our student outreach programs through interactive workshops and site visits. By sharing my journey from a student leader to a graduate engineer, I aim to show young people how civil engineering shapes their daily lives.

I am committed to dedicating my energy and organisational skills to lead a team that delivers tangible value to the ICE G&S community.

4. LEE Ho Yan Janice (GMICE)

Biography

Lee Ho Yan, Janice is a currently a graduate engineer in the transport and infrastructure sector in a leading local engineering consultant. She holds a Bachelor's degree in Civil Engineering from the Hong Kong University of Science and Technology and is currently pursuing postgraduate studies at HKUST to further strengthen her technical foundation and professional development.

Janice is an accredited NEC4 ECC Project Manager, with growing expertise in project coordination, contract administration, and multidisciplinary interface management. Her work spans collaboration with engineering, commercial, and environmental teams in delivering complex infrastructure projects.

Janice also actively contributes to the in serving the civil engineering graduates and students. She currently serves as a co-opted Member for the ICE HKA G&S committee session 2025–26 and is a member of the organizing committee for the ICE HKA G&S Delegation 2026, supporting technical exchange and professional growth among young civil engineers.

Platform statement

As a current co-opted member of the ICE HKA G&S committee session 2025–26, I am grateful for the opportunity to support activities that bring young engineers together. Through this experience, I have seen how meaningful it is when members can learn from one another and feel connected to the wider civil engineering community.

I hope to continue contribute to ICE HKA G&S by creating accessible, engaging and well-rounded initiatives for students and graduates. If elected, I will focus on supporting events that encourage learning, exchange of ideas, and a welcoming environment for all young members. My goal is to strengthen the G&S community and contribute to the ongoing efforts of ICE HKA.

Candidate biography and platform statement**

5. LEE Hoi Nam

Biography

Lee Hoi Nam, Venus graduated from the Hong Kong University of Science and Technology with a Bachelor of Engineering in Civil Engineering. She is currently a management trainee in a local contractor company.

Throughout her university life, Venus played an active role in promoting civil engineering to university students. Taking up the role as External Vice-president in the Civil and Environmental Engineering Students' Society allowed her to nurture her problem-solving and communication skills under substantial activities. Coordination skills, together with team-working and leadership were established when organizing functions.

After graduation, Venus aims to continue her passion in serving the civil engineering graduates and students, as well as encouraging youngers to join the civil engineering field by becoming a committee member of ICE HKA G&S.

Platform statement

I believe ICE HKA G&S is a platform to connect and engage us, young professionals and students to inspire, connect people, exchange knowledge and promote the industry to the public. I would like to take a step forward and serve the G&S division with my enthusiasm and dedication to organizing events to benefit more young civil engineers. I am capable of taking up the responsibility so I could further inspire students to pursue careers in our industry and enhance the profile of the civil engineer profession.

**Institution of Civil Engineers, Hong Kong Association
Graduates and Students Division
Committee election, session 2026-2027
Candidate biography and platform statement**

6. LEUNG Ka Lun

Biography

Alan Leung is a Civil Engineering Graduate at the Drainage Services Department, currently contributing to the relocation of Sha Tin Sewage Treatment Works to Caverns. He obtained his bachelor's degree and is concurrently pursuing a master's degree at The University of Hong Kong. Alan has built a robust portfolio through roles at the Highways Department where he worked on the Expansion of the Bus-Bus Interchange at Tate's Cairn Tunnel and AECOM, tackling major infrastructure projects like the Widening of Tsuen Wan Road.

Alan demonstrated strong leadership and teamwork as an HKU Student Ambassador, actively promoting the engineering profession and facilitating career-building events for students. Demonstrating a strong capacity for innovation, he secured championship victories in the 2024 Sustainability Hackathon and the 2025 ACEHK x ICE HKA G&S Design Thinking Workshop by developing cutting-edge solutions for Hong Kong's construction industry.

Aspiring to join the ICE HKA G&S committee, Alan aims to leverage his communication skills and cross-sector experience to make a meaningful contribution to the Institution. He is deeply committed to inspiring youth to pursue engineering, curating high-impact collaborations, and fostering a supportive ecosystem for professional growth within the industry.

Platform statement

As a young graduate engineer, my vision centers on empowering our peers and advancing our industry through three core pillars. Recognizing the demanding journey to professional status, I am dedicated to empowering graduate engineers by providing robust career support, chartership guidance, and cross-sector networking opportunities. I am passionate about cultivating an engaging environment that nurtures teenagers' interest in civil engineering through targeted outreach and interactive workshops, inspiring the next generation to shape our built environment. I am also committed to championing sustainability across its environmental, economic, and social dimensions, equipping young engineers to lead the industry's green transition through knowledge-sharing. Together, we can build a supportive, forward-thinking community where every young engineer is equipped to achieve professional excellence.

Graduates and Students Division
Committee election, session 2026-2027
Candidate biography and platform statement**

7. LI Yan Wa Irene

Biography

This is Irene Li (student membership no. 93781374), and I am a year 4 student at City University of Hong Kong. Since my third year, I have actively participated in many ICE Hong Kong Association Graduates and Students Division (G&S) events, including delegations to Japan and South Africa, technical seminars, site visits, and geo-tours. These experiences have deepened my knowledge of the civil engineering industry and allowed me to build meaningful connections with professionals and fellow students.

In 2025, I was part of the winning team in the ICE HKA G&S Model Building Competition, where we designed an innovative coastal defence structure capable of withstanding wave loads. Following this achievement, I was elected as a co-opted committee member of the G&S Division. In this role, I have assisted the Model Building Competition leader by drafting and updating competition publications and by organising and conducting model trial tests to support participants and ensure a successful event.

With a passion for hands-on learning and student development, I am eager to contribute further to G&S initiatives that connect academia with industry practice.

Platform statement

As a passionate advocate for practical civil engineering education, I am eager to serve as a committee member overseeing the Model Building Competition in the upcoming year. With one year as a winning participant and another as a co-opt in model building competitions, I have gained firsthand insights into structural design challenges, team dynamics, innovative material use, and judging criteria—from seismic-resistant buildings to wave-resisting concrete structures.

I aim to enhance the MBC by introducing fresh themes that address real-world issues like climate resilience and sustainability, streamlining logistics for smoother events, boosting participation through university outreach and promotion, and fostering stronger industry judging panels for valuable feedback and networking. My experience will ensure the competition remains engaging, educational, and inspiring for undergraduates, strengthening G&S's role in bridging academia and profession.

Graduates and Students Division
Committee election, session 2026-2027
Candidate biography and platform statement**

8. LIU Xinwei (GMICE)

Biography

I'm Xinwei Liu, currently I'm an Assistant Engineer at Mott MacDonald, and I'm so excited to step up for the G&S 26-27 Select Committee.

I have been actively involved in ICE HK since becoming a Graduate Member, contributing to a range of technical visits, including the Fanling Site Visit, Visit to the Aviation Fuel Supply Company, and Visit to the Drainage Improvement Works in Tsim Sha Tsui. In addition, I have worked closely with distinguished members of the G&S Committee to bring ideas to life by participating in the organisation of events such as the Mock CPR, the Seminar on Framework Alliance and Term Alliance Contracting, and the One-day Seminar 2026 as a helper. These experiences have given me a solid understanding of how our community operates—and how it can continue to grow.

I'm organized, detail-oriented, and always happy to lend a hand. During my studies at CityUHK, I served as the External Programme Leader for Postgraduate Association, where I organized social gatherings and academic lectures. As a student from Mainland, I am also eager to contribute to G&S's exchange programs and activities in the Greater Bay Area.

Hope to build something great and fun together.

Platform statement

I'm honoured to stand for election to the G&S Committee 26-27, and I would like to contribute through three key focus areas.

1. **Member Development:** I'm committed to enhancing the G&S experience for all graduate and student members. I will support the planning of the CPD events, mentoring programmes, and social gatherings as much as I can.
2. **Cross-Border Integration:** As I worked in both Mainland and Hong Kong, my background places me at a natural intersection of the two engineering societies. I will actively facilitate exchanges between HK and engineering groups in the Great Bay Area. By organising technical visits and networking sessions, I aim to help young engineer on both sides tap into regional opportunities and build long-term collaborations.
3. **Community Expanding:** Engineering is about people as much as technical excellence. I will work to foster an inclusive and welcoming environment where members feel connected, supported, and inspired to contribute. I'll spent time in encouraging everyone to join ICE, including but not limited to promoting free student memberships on campus. Meanwhile, I also believe it's important to strengthen exchanges with other local engineering institutions.

I hope we can create something fun, meaningful, and truly rewarding together.

Graduates and Students Division
Committee election, session 2026-2027
Candidate biography and platform statement**

9. LUI Hoi Hin

Biography

Eddie Lui is a final-year Civil Engineering student at The University of Hong Kong. Besides a solid academic background in civil engineering, Eddie gained practical experiences through internships at the Housing Department and Vibro (H.K.) Limited, where he applied theoretical knowledge to real sites, strengthening his problem-solving, communication, and stakeholder-coordination skills.

Eddie is passionate about connecting people and building professional communities. As Manager of the Overseas Tour Organizing Committee for the H.K.U. Engineering Alumni Association, he has led the planning and delivery of overseas tours to Japan and the UK for over 30 alumni and students, facilitating dialogue on sustainable development. He previously served as Student Representative of the HKIE Building Division, where he helped promote technical seminars and member-focused events.

Eddie now hopes to contribute these outreach and engagement experiences to ICE HKA G&S, focusing on external engagement to strengthen links between students, graduates, and industry partners in Hong Kong. He is particularly keen to initiate joint activities with professional institutions, co-create technical visits and knowledge-sharing sessions with universities and firms. He aims to build a more visible, connected and supportive ICE community that broadens young engineers' horizons and supports their professional growth.

Platform statement

Should I be elected, I will use my experience in coordinating overseas study tours and multi-party activities to strengthen external engagement and support member's development. I enjoy connecting people and creating platforms for exchange, and I hope to further enhance ICE HKA G&S's role as a recognised hub where students and graduates can meet young professionals and peers from other disciplines. These objectives shape my goal to deliver inclusive, well-structured joint society events for our members.

I hope to work with other professional bodies to co design seminars and site visits on current infrastructure challenges and emerging practices, with built in networking through small group discussions and cross society mixers. I will also apply my delegation organising experience to support the delegation team where appropriate, particularly in planning technical visits and post trip sharing that benefits the wider membership. By engaging partners early and promoting activities clearly to both students and graduates, I aim to broaden members' networks, increase ICE's reach and reinforce our role as a connector within Hong Kong's engineering community.

Graduates and Students Division
Committee election, session 2026-2027
Candidate biography and platform statement**

10. Andre Cahyadi SALIM (GMICE)

Biography

Andre C. Salim is a Graduate Engineer at Asia Infrastructure Solutions (AIS) in Hong Kong. He holds a bachelor's degree in Civil Engineering from the Harbin Institute of Technology and a master's degree in Civil Engineering from Shanghai Jiao Tong University. At AIS, he is currently involved in the design of the East Kowloon Line Smart and Green Mass Transit System, where he contributes to the structural design of station and depot superstructures, as well as associated foundation systems. His role also includes integrated planning and coordination with multidisciplinary teams to ensure design consistency, constructability, and compliance with project requirements.

Beyond his project responsibilities, Andre is an active member of the AIS Young Professional Circle (YPC). He has helped coordinate multiple volunteer initiatives within the company and participates in team building activities, including serving as a member of the AIS Dragon Boat Team.

Andre also has a strong academic background. During his master's studies, he published three peer reviewed research papers in reputable international journals such as Engineering Structures and Ocean Engineering. His research contributions led him to achieve first runner up in the IOM3 Young Persons' Lecture Competition 2025 (Hong Kong Heat), reflecting his ability to connect academic insight with practical engineering...

**Institution of Civil Engineers, Hong Kong Association
Graduates and Students Division
Committee election, session 2026-2027
Candidate biography and platform statement**

Platform statement

I am eager to serve on the ICE Graduate & Student (G&S) Committee because I believe strongly in the power of community, knowledge sharing, and international collaboration in shaping the future of our profession. Throughout my academic and professional journey, I have benefited greatly from the guidance of mentors, the support of peers, and the opportunities provided by professional institutions. I now hope to give back by contributing actively to a more engaged, connected, and inspired ICE community.

If elected, I will bring enthusiasm, initiative, and a genuine commitment to strengthening the G&S network. I am particularly passionate about creating platforms that help young engineers grow technically and professionally. I hope to play an active role in organising high quality technical seminars and knowledge exchange activities that highlight recent advancements, emerging technologies, and best practices across civil engineering disciplines. I am also keen on building stronger bridges between G&S delegations, fostering collaboration across engineers in Hong Kong

Engagement and inclusiveness are central to my vision. I aim to help expand ICE's reach by connecting more international members, supporting university outreach, and encouraging early career engineers to become actively involved. I also hope to collaborate with other engineering institutions to organise joint workshops...

11. WONG Hoi Yu

Biography

My name is Ashley (student membership no.: 93676597), and I am a recent Civil Engineering graduate from HKUST, now pursuing my Master's degree while working as a Management Trainee at Chun Wo. My journey in this industry has been deeply shaped by my commitment to student leadership and peer development. At HKUST, I served as Vice President of the Civil and Environmental Engineering Student Society and Deputy Chairman of the HKIE Student Chapter. I also contributed as a Civil Peer Mentor, guiding junior students. These roles taught me how to bridge the gap between academic theory and professional practice, organising technical visits and networking events that brought students and industry experts together. Currently, as a committee member of the HKUST Civil and Environmental Engineering Alumni Association, I continue to strengthen the bond between past and present students.

I have actively participated in and assisted as a helper at several ICE HKA G&S events, including technical seminars, Model Building Competition, Communication Competition, etc.

Now balancing postgraduate studies with hands-on construction experience, I am eager to bring this blend of academic insight and practical knowledge to the ICE G&S Committee. I look forward to creating impactful opportunities for our graduates and students.

Platform statement

Building on my experience in student leadership at HKUST and my current role bridging academia and industry at Chun Wo, I am eager to contribute to the ICE G&S Committee by strengthening the connection between graduates, students, and the professional world.

I aim to focus on three key areas. First, I will expand technical and networking events that connect students with industry practitioners, drawing on my experience organising site visits, functions, and seminars to ensure these opportunities are both accessible and relevant. Second, I want to enhance mentorship initiatives, helping junior members navigate their studies and early careers by facilitating guidance from experienced professionals and recent graduates. Finally, I will work to increase collaboration between ICE G&S and university student societies, creating a stronger and more unified platform for peer support and knowledge sharing.

I am committed to building a bridge between academic life and professional practice, ensuring every graduate and student feels supported, inspired, and equipped for the journey ahead.
